

Better Healthcare for Your Best Health

IntuneHealth™ 

**At IntuneHealth,
we have one focus:
your best health. We
give you the highest
quality value-based
care (VBC) to keep
you healthy and
prevent issues before
they become serious.**

What is IntuneHealth VBC?

With IntuneHealth VBC, you can enjoy your best health because we focus on preventive care and your total health. We stay on top of your health by truly knowing you, your medical history, and what you need to be healthy. Our care teams use advanced medicine to detect and prevent illness. And with IntuneHealth's proprietary platform, we have numerous data points to identify potential issues before they become serious.

IntuneHealth VBC is advanced preventive medicine that can make a world of difference in your health. Because we partner with you to catch issues early, you spend less money and time improving your health. You can potentially recover from illnesses and injuries more quickly when you start from a place of greater health and wellness. And you'll have fewer medical tests, procedures, medicines, and surprise hospital bills when we partner together to keep you out of the hospital in the first place.

The combination of a Medicare Advantage plan and doctors who specialize in caring for older adults on Medicare helps you get the preventive care you need to help you stay healthy. Together, you and your doctor create a customized plan that fits you, your health needs, and your dreams for your best life.

Healthcare focused on you.

Your best health is our bottom line. In VBC, doctors are rewarded for how healthy they keep their patients — not for seeing as many people as they can in a day.

Take all the time you need during your IntuneHealth visit. It's the best way for your doctor to truly understand your health concerns and what's important to you. Our doctors spend around **30 to 45 minutes** with patients. Compare that to doctors who don't practice VBC, who average 15 minutes per patient. **We focus on quality, not quantity.** With fewer patients and a team of health care providers and specialists working together to keep you healthy, your doctor can better identify concerns and your care needs.

Your relationship with your doctor matters a lot. We will never rush you. We will always listen to you and take your concerns seriously. And more face time means more opportunities to deepen the long-lasting, trusting relationship between you and your doctor.

If you need to see a specialist, we take care of all the details every step of the way. At IntuneHealth, we consult with our hand-selected list of best-in-class, in-house specialists who also believe in preventing illness, not overtreating and overprescribing.

From scheduling to making sure specialists have your medical history and medications, we handle all that work. All you have to do is show up. Your doctor coordinates and communicates directly with your specialists to personalize your care — and to make sure everyone is on the same page with your health and goals.

We're "Intune" with you.

With IntuneHealth's unique VBC model of care, you will have 24/7 access to your doctor and care team. This helps us catch changes in your health early on to keep you healthier than ever.

**AND YOU CAN SEE YOUR DOCTOR WHEREVER YOU WANT.
WE DELIVER CARE ON YOUR TERMS. WE OFFER:**

- Walk-in and same day appointments
- In-person visits at one of our state-of-the-art IntuneHealth Centers
- 24/7 access to virtual visits through our app
- Text and phone – you have your doctor’s cell number
- Convenient home visits by our Mobile Care Champions – you don’t have to be too sick to leave your home to get care – we’ll come to you

Whatever you choose, rest assured that you’ll be given the time, attention, respect, and answers you deserve. Our goal is your goal: to keep you healthy and happy for the long term.

We’re here for you in life’s unexpected moments, too. At IntuneHealth, we’re here for you days, nights, weekends, and holidays. If you need to go to a hospital, you will have an IntuneHealth representative who will work with the hospital staff throughout your stay and for any follow-up appointments. This way, they will have access to your complete medical history, conditions, and prescriptions which can greatly help improve the quality of care you receive in the hospital.

For info on choosing the right plan, check out our Medicare Advantage Guide at [ANewWayToMedicare.com](https://www.ANewWayToMedicare.com).

Unlock a whole new level of care.

VBC is the smart choice for older adults. You deserve a dedicated team working to keep you at your healthiest.
